

MAY 18 – 19, 2022

A TWO-DAY WORKSHOP

“Effective Presentation: Oral and Poster”

Organized by

Department of Chemistry

Shaheed Benazir Bhutto Women University Peshawar

Oral presentations, also known as public speaking or simply presentations consist of an individual or group verbally addressing an audience on a particular topic while poster presentation is a way to communicate your research or your understanding of a topic in a short and concise format. It usually includes two elements - a poster and a brief (usually no more than 2 minutes) explanation.

An oral or poster presentation, at a congress or conference with an academic or professional focus, is the presentation of research information in the form of a power point and oral presentation or paper poster that conference participants may view. These type of sessions are particularly prominent at scientific conferences such as science, medical and engineering congresses. It develops the ability to communicate perceptively and concisely - an important workplace skill.

In this workshop the audience will be guided given knowledge about oral and poster presentation to effectively present their research findings.

Who should attend?
